- Box of 50 capsules available in A1, A2, A3, A3.5, A4, B2 and B3
- Box of 50 capsules available in A1, A2, A3 and A3.5

INSTRUCTIONS FOR USE:

POWDER / LIQUID SYSTEM (REGULAR SET ONLY)

1. Gently tap Riva Self Cure powder bottle on the hand. Using the plastic scoop provided, dispense one level measure of powder onto the mixing pad.
2. Carefully dispense the recommended number of drops of Riva Self Cure liquid into the centre of the powder. 
3. Mix the liquid with one part of the powder for 10 seconds and then include the second part and continue mixing for another 15 to 20 seconds.
4. Mix liquid with the powder and place into the Riva capsule applicator. 
5. Click the trigger of the Riva capsule applicator until glass ionomer cement is seen through the clear nozzle.
6. Extrude Riva Self Cure into the cavity, being careful not to trap air or any high speed capsule mixer (4000 – 4800 rpm).
7. At the end of the working time, apply Riva Coat to all exposed surfaces of restoration. At 23ºC / 74ºF, the working time will be about two minutes. 
8. Light cure for 10 seconds.
9. Indent patient not to eat for at least one hour after procedure.
